ABSTRACT:

PROBLEM TO BE SOLVED: To obtain a skin lotion capable of enhancing the effects of usual bleaching agents and having stable and excellent bleaching actions.

SOLUTION: This skin lotion is specific in containing one or more of the following ingredients (A) and (B); (A) an extract of Myrciaria Dubia and (B) a bleaching agent. The extract of Myrciaria Dubia of the ingredient (A) in this invention is prepared by extracting fruits of Myrcaria Dubia, a plant belonging to the family Myrtaceae by using an extracting solvent.
